

CGF 50mm Gable Flashing Profile - 3.0mtr

6mtr Lengths are available ask us for a quote

- Concealed Fixings for high quality finish
- Ideal for capping single, double or triple glazed glass, acrylic and polycarbonate structures
- Adjoining panels on the same plane or pitch to 5 degrees up or down
- High quality supply EPDM gasket with cord, re-tained in situ by special design
- So versatile for - conservatories, sky light roofing, glazed walk ways, shopping centres, swimming pools, railway and bus stations etc...
- Install wet or dry - no increased costs due to wet weather construction
- Maintenance friendly - damaged glazing is easily replaced - remove caps, loosen screws, replace damaged panel and tighten Capex down
- Gable Flashing Profile for increased strength and a high quality finish
- RAG 45 is a high quality flexible EPDM compatible with glass, polycarbonate and acrylic sheeting
- RAG 45 prevents damage to the glazing by forming a protective barrier between the glazing and the rafter
