

Antique Crest Aluminium

A robust cast aluminium section. Polyester powder coated in white or brown.

Each paried section is 210mm height x 300mm length, a stepped feature connecting them together avoids gaps.

Ideal for both Cresfinex Ridge Systems and the crest retaining profile.

Can be used without retaining profile channels - Just screw them down through the holes in the base flanges.

Matching finials are also available in 0either cast aluminium with an overall height of 350mm or UV stable anti-static polymer with an overall height of 340mm.
