

# Titebond III - Titebond 3 - Ultimate Wood Glue

For wood-to-wood applications there is no better choice than Titebond III.

The most advanced wood glue available today it combines the strength, sandability, ease of use and water clean up of PVAs [aliphatic resin] with the durability, open time and water-resistance of polyurethanes.

- \* Passes ANSI/HPVA Type I water-resistance
- \* Waterproof formula - cleans up with water
- \* Superior strength - Strong initial tack
- \* Suitable for interior and exterior applications
- \* Longer open assembly time
- \* Lower application temperature
- \* Unaffected by finishes
- \* FDA approved for indirect food contact

Compared to Polyurethanes, for wood-to-wood Titebond III is stronger, safer, easier to clean up and less expensive. It requires less clamp time, doesn't foam and won't stain your skin.
