

Festool HL 850 EB-Plus GB

Planing and rebating right up to the edge: the rebate depth of conventional electric planers is quite limited and you are always left with the burden of reworking. The HL 850 EB relieves you of this. The patented, single-bearing planing head enables you to work flush with the workpiece to unlimited rebate depths

- Planing to the edge, single-bearing head for unlimited rebating depths
- Electronics
- Spiral blade for a smooth planing pattern
- Efficient dust extraction at the left/right side no clean-up needed
- Quick blade changes

Main applications

- Planing door rebates
- All kinds of window rebate
- Texturing surfaces
- Planing beams, planks and broad surfaces

Supplied with:

- parallel side fence
- rebate depth stop
- extraction adapter
- operation tool
- in a SYSTAINER SYS 3 T-LOC
