

Small Dozuki tenon saw

This is a smaller version of the Dozuki that has a 150mm long blade with 30mm depth of cut. The blade thickness is 0.3mm and the kerf 0.49mm, with its fine 18tpi it makes a handy saw for a range of small sawing tasks and close joints. A special pecker tooth at the tip allows you to start a cut in the middle of a panel. The overall length is 370mm.
