

15W Soldering Iron

The Weller SP15NUK is a high performance, light-duty Soldering Iron.

3 LED's deliver light to the application for superior accuracy.

The triangular grip area provides a more stable and effective way to control the tip position.

The round, soft-grip, non-slip handle design helps relax the hand during extended use, providing a mechanism to easily roll and position the tip for application needs.

To ensure long life, the soldering iron comes with a stainless steel heater, impact resistant housing and heat resistant LED's.

Ideal for micro components, electronic kits and low voltage working.

Supplied with:

Peg hook.

Basic Iron stand.

User manual.

Wattage: 15 Watt.

Voltage: 230 Volt.

Temperature: 400°C (750°F).

Iron tip: S5 2mm diameter.

Other compatible tips: S3, S31, S32.

Cord length: 1.60m.

Weight: 260g.
