

Cast Iron drill stand

The DMS26 is a unique, tried and tested Record Power design, capable of outstanding levels of accuracy and excellent leverage power. Within the cast iron head, an adjustment block is controlled by a brass screw, allowing any play or movement which develops through wear and tear to be quickly and easily eliminated, giving a lifetime of accurate service. Thanks to the sturdy design and leverage capabilities, the DMS26 can also be easily and economically converted for use as an effective mortar (with the optional WR101M attached) and the swivel head function of the headstock to work over the side of a bench makes this probably the most versatile and accurate stand available today.

*** Drill stand only - drill NOT included ***

Stroke: 73 mm

Throat Depth: 127 mm

Holding Collar: 43 mm

Weight: 17.4 kg

Size: H730 x W260 x D380 mm
