

Door Chain =

MARCUS BLACK IRON DOOR CHAIN FB108

Simple black iron door chain that is a practical solution for protecting entrance doors in residential and commercial settings. It will allow the door to be opened just enough to verify who is at the door. Part of the latest smooth, black iron range of external hardware from M. Marcus.

To meet modern design preferences M. Marcus have removed the deep surface indentations found in traditional black ironmongery. Leaving only the natural surface grains to create a rustic yet smoother contemporary appearance. These black iron door chains will complement traditional solid wooden doors or light coloured door fronts. Through use and time, the metal will not be effected by the elements due to quality and production process.

All the smooth black door chains in this collection are made from malleable iron, treated with zinc phosphating process and then powder coated that has unique UV protection added to the coating process making these handles a great choice for external use.

Supplied in SINGLES complete with fixings.
