Finger Plate FB431=

MARCUS BLACK IRON FINGER PLATE FB431
Simple black iron finger plate that is a practical solution for protecting doors from finger marks and stains in residential and commercial settings. Part of the latest smooth, black iron range of external hardware from M. Marcus.

To meet modern design preferences M. Marcus have removed the deep surface indentations found in traditional black ironmongery. Leaving only the natural surface grains to create a rustic yet smoother contemporary appearance. These black iron finger-plates will complement traditional solid wooden doors or light coloured door fronts. Through use and time, the metal will not be effected by the elements due to quality and production process.

All the smooth black finger-plates in this collection are made from malleable iron, treated with zinc phosphating process and then powder coated that has unique UV protection added to the coating process making these handles a great choice for external use.

Supplied in SINGLES complete with fixings.
Dimensions:
12" x 3"
