

Concrete Hardener & Dustproofers

Product Description

EVERBUILD CONCRETE HARDENER AND DUSTPROOFER is a concentrated silicate solution for direct application to concrete. Hardens and dustproofs the surface.

Benefits

Internal and external use.

Fast acting.

Leaves a residual surface to prevent further dusting.

Helps prevent bloom/efflorescence.

Areas For Use

As a dustproofers for new and old concrete/cement based floors, screeds and paving in factories, garages and domestic dwellings.

Limitations

Only of use on cement containing surfaces

Always wash down to remove unreacted material after use.

Will not restore badly disintegrated concrete. Always carry out repairs prior to use using EVERBUILD EPOXY MORTAR GP.

Do not treat concrete within 28 days of laying.

Application

Always read label before use and wear suitable protective equipment. Remove all surface debris and growth from the area to be treated.

Repair any defects. Apply by brush or spray at a rate of 1 litre per 5 sq. meters. Work well into surface Apply a second coat after 24 hours.

Allow second coat to dry for 24 hours then hose down entire area with cold, clean water to remove any unreacted surplus material. Further coats may be applied to exceptionally dusty floors.
