

# Treatex Stain Inhibitor 2.5l-

Treatex Stain Inhibitor is an easy to apply primer which is designed to prevent tannins from migrating to the surface of timber and causing unsightly staining. Exterior timbers with high tannin levels (e.g. oak, idigbo, teak, cedar, mahogany) should be treated with Treatex Stain Inhibitor before being sealed with Treatex Classic Colour Collection. One coat of Treatex Stain Inhibitor should be applied with a brush or roller
