

Adventure Stainless steel water bottle

These are designed for rugged outdoor use by rugged outdoor types so they can take a knock or two. Which makes them ideal to take with you when you're working on those remote sites that lack power or fridges and your only option for a refreshingly chilled drink is going to be to take it in with you.

Manufactured from Stainless Steel, these sturdy water bottles are leak proof and dishwasher safe.

Available in two sizes, they will keep cool drinks cool for an hour, and iced drinks iced for four hours.

*** These are being phased out. Only available while stocks last. ***
