

# SikaBond AT Metal

SikaBond® AT Metal is a one part, solvent-free, elastic adhesive for porous and non-porous substrates, particularly for metals and for the following applications:  
 • internal and external bonding of metal façade- and roof elements, roof coverings, cover plates, metal sheets, sky lights, bonding of metal cladding etc.

Characteristics /

Advantages

- 1-part, ready to use
- Very good adhesion without priming on many metals and non-porous substrates i.e. copper
- Good adhesion on porous substrates (i.e. concrete, roof tiles, mortar etc.)
- Excellent workability
- Short cut off string
- Good initial tack and fast curing
- Non-corrosive
- Good weathering and water resistance
- Silicone free
- Solvent free
