

Alukap-XR Bar Endcap White=

ALUKAP-XR's additional bar end caps can be purchased in both brown and white as spares, replacements or additional end caps to ensure fixing is complete to the highest standard. These end caps reduce the chance of glazing slipping free as they provide another layer of constraint after fixings.

ALUKAP-XR is a weather-resistant glazing bar system from Clear Amber that sits atop rafters for a clean, attractive finish. The sturdy and durable system comes in a range of profiles and finishes, in both white and brown so you can match the rest of your building or surroundings with ease. Compatible with timber rafters, the fixings for ALUKAP-XR are concealed and made from aluminium like the rest of the system so you're assured quality and neat installation. Decorative finishing castings are also available so you can bring even more style to your system.
