

Premium Range Shallow Feeder Buckets

From the Perry Equestrian Range comes the Perry Premium Range Shallow Feeder Bucket. When feeding from the bucket, the shallow design enables the easier access for your horse, pony or other animals and the lower sides allow the animals a clear view of their surroundings. The broad and flat base gives added stability when mixing food or feeding. The Perry Equestrian Perry Premium Range Shallow Feeder Bucket is stackable and carrying is easy thanks to the comfort rolling grip handle.

All Perry Premium buckets are manufactured to be stronger, tougher and more resilient than the market standard.
