

RUTLAND 3 replacement closer

RUTLAND 3 replacement closer

New RUTLAND 3, faster and easier to fit replacement closer.

The alignment back plate allows for quick precise placement of the closer over previously installed units. This is then further supported by 4 additional screws through the new mechanism for ultimate installation.

The seamlessly welded cover is fractionally larger than traditional covers. This is to ensure there is no need for redecoration where the door may have been re-painted or lacquered over time.

Suitable for left hand, right hand, push or pull installation application. All fixings and installation documents are in the box for timber, composite or metal doors and frames.

The New RUTLAND 3, faster and easier to fit replacement closer!
