

# Hikoki BSL36B18 18v/36v 8.0Ah Li-Ion Multi Volt Battery

AC power. DC freedom.

The Hikoki BSL36B18 18v/36v 8.0Ah Li-Ion Multi Volt Battery is a innovative battery with the ability to power both 18 and 36 volt machines. This groundbreaking technology gives you cordless power over 1,000w on 36 volt machines. These batteries nearly have the same dimensions and weight as the older Hitachi 18 volt 5Ah batteries, making these batteries as convenient as ever. This battery is compatible with all 18 and 36 volt Hitachi/Hikoki slide fit machines.

When this battery is inserted into a 36 volt machine, the machine is powered by 36 volts and 4Ah. When inserted into a 18 volt machine, the machine is powered by 18 volts and 8Ah.

This version of the Multi Volt battery by Hikoki offers an impressive 3 Amp Hour increase over the standard 5Ah Multi Volt battery, giving the battery a 8Ah rating. This allows the battery to last much longer before needing to be recharged.
