

Hex bits, 25mm, standard impact duty

Wera BTZ bits feature a special bitorsion zone which reduces the hardness of the shaft in comparison to the tip. This means that peak loads are absorbed by the bitorsion zone, enhancing the service life and efficiency of the bits.

BTZ bits can be used in impact drivers.

We offer mixed bit options for four or ten bits, just enter quantities and sizes required in the Notes when going through the checkout stage.

*** please note, picture shows the 5mm size, other sizes are available in the range. ***
