

# Portamate speedhorse

It deploys in under two seconds, is rated for 680kg, nearly 100kg more than competitor products intended for the same role.

It has a longer top - 45" / 1.14m that means more stability and the top is pre drilled simplifying installation of sacrificial timbers.

Non sequential leg folding means there's no faff when it's time to take down, there is no "wrong order" when folding the legs.

## Price

Portamate Speedhorse sawhorse - single (Product reference 9268-22138)	£49.95
Portamate Speedhorse sawhorse - pair (Product reference 9268-22139)	£90.42
