

Deep Throat Steel bar F clamp with clutch

When your project calls for a deeper hold, reach for Jorgensen deep throat steel bar clamps. They contain all the same high-quality materials as our traditional steel bar clamps but with five-inch, seven-inch, and nine-inch reaches. Welders take note: the OPTIONAL copper-plated screws, handles, and swivels help protect against weld spatter in welding jobs.

*** PLEASE NOTE - clamps will be supplied with steel threads. The copper plating shown in the picture is a "to order" OPTION. If you require copper plating please contact us for price and lead time. Currently this option is ONLY available on the 7" depth clamps ***
