

Brummer Interior Filler - 250G

Ideal for repairing furniture, doors, skirting boards and wooden floors, picture frames and mouldings, Brummer Interior Wood Filler is heat proof (up to 90°C), works equally well on most metals and can be used under nearly all types of decorative finish including polish, lacquer, varnish and paint. Highly versatile, it can be used outside if varnished or painted over and mixed with other Brummer wood filler colours of the same type. It can be drilled and sanded just like wood itself, or stained with a proprietary stain to achieve any desired shade.
