

Era - Fortress Dead lock 2 1/2" & 3" Satin &

Era BS High Security Mortice Lock

The new Era High Security Fortress Lock range reinforces ERA's position as the UK's largest producer of mortice locks.

The new Fortress range fully complies with both the European (BS EN 12209) and British (BS3621:2007) standards. Further recommendation from the police-endorsed Secured by Design programme guarantees insurance companies exacting criteria is not only met but exceeded.

There are three locks in the range: the Fortress Euro, the Fortress Oval and the Fortress 5 Lever Mortice. All are available in sashlock and deadlock versions, with hardened steel plates to defend against drilling and two hardened steel plates in the deadlock to resist hacksawing. Locksmith kits are available and all the locks come complete with full fitting instructions.

Price
