

Fisher FIP 300SF

Fischer Cartridge FIP300SF F Bond Resin

Suitable for: Non-concrete masonry

The fischer Injection Mortar contains a strong, quick setting 2-component mortar, which is stored in separated compartments

Only when using the setting mortar the 2 components are combined in the static mixer

The setting mortar is activated, when the extruded mortar turns grey in colour

Low odour

Opened cartridges remain usable

Expansion-free anchoring

No separate mixing required

Environmentally friendly
