

Clifton 3110 3 in 1 Plane - Shoulder / Rabbet / Rebate

The Clifton 3110 plane is an extremely versatile tool, combining the features of shoulder rebate, chisel, and adjustable mouth bull nose planes.

As a shoulder plane the front extension piece is fitted.

To use as a chisel plane all nose pieces are removed.

For use as a bull nose plane the thinner nose piece is fitted in conjunction with one or both of the precision machined 1/32" or 1/64" steel shims. For very fine work both shims can be removed.

The blade depth on the 3110 can be finely adjusted by means of a screw adjuster nut.

The body is machined from a quality grey cast iron and precision ground on the sole and sides.

A fine tool for any woodworkers or cabinet maker's collection.

Width: 28mm

Body Length: 89mm

Longest Attachment Length: 62mm

Shortest Attachment Length: 9mm

Cutter: 29mm High quality oil hardened steel 59-61 Rockwell 'C', cutting edge ground to 25° primary and 30° secondary.
