

HL27 Head torch - 330 lumens

Incredibly versatile and easy to use, the HL27 Focusing Head Torch has a light output of 309 lumens making it excellent for a variety of uses where you might need a lot of light.

It has a removable top strap and can be used with a HARD HAT style safety helmet using the included helmet clips. The easy-to-grip twist focusing ring makes it easy to adjust the beam from flood to spot, even while wearing gloves.

Our Pure Beam Focusing Optic produces our largest, Ultra-View Flood Beam, giving you the ability to shed light on a big area while the Bulls-Eye Spot Beam can illuminate targets as far as 122 meters away while still giving you an enhanced field of vision with its transition halo. Our patent-pending headlamp light-control system uses our Light Output Control Wheel and a fully encased sensor that detects a magnetic field, making the light output control more durable and weatherproof. For added durability, an expandable Z-Cord provides power to the LED from the battery pack and is built in to the headband to reduce the possibility of snagging. Tested and rated to ANSI/FL1 standards by an independent laboratory.

Pure Beam Focusing Optic

Twist focus

309 lumen light output

3 hour 45 minute runtime

122 meter (400 ft) beam distance

Removable top strap

3 X AA batteries (included)

Expandable Z Cord in headband for added durability

Adjustable elastic straps

Easy to operate front power switch

Hinged beam adjustment to position light where you need it

Impact and water resistant

Weight: 4.4 oz. / 125 g (including batteries)
