

905 All Wthr Roof Coating

Product Description

BLACK JACK ALL WEATHER ROOF COATING is a solvent based, full bodied black brushable compound with added fibres for reinforcement. It is specifically designed for overcoating leaking roofs.

Dries to a tough black coating.

Benefits

- Fast drying.
- Unaffected by water immediately after application - can be applied when rain is imminent.
- Can also be used to bond felt.
- Brush applied.

Areas For Use

BLACK JACK ALL WEATHER ROOF COATING is an effective, general purpose roof coating. It is resistant to wash off by rain almost immediately after its application and is therefore ideally suited for winter use. BLACK JACK ALL WEATHER ROOF COATING may be applied by brush to waterproof and re-seal many different types of roof coverings, including:

1. Asphalt roofs.
2. Built-up felt roofs.
3. Concrete roof decks.
4. Asbestos-Cement sheeting.
5. Metal sheeting, including iron, steel, zinc and lead.
6. Slates, tiles.
