MARCUS BLACK IRON PULL HANDLE FB346

Simple black iron pull handle that is part of the latest smooth, black iron range of external hardware from M. Marcus, perfect for creating a unified look in your home.

To meet modern design preferences M. Marcus have removed the deep surface indentations found in traditional black ironmongery. Leaving only the natural surface grains to create a rustic yet smoother contemporary appearance. These black iron door pulls will complement traditional solid wooden or light coloured doors. Through use and time, the metal will not be affected by the elements due to quality and production process.

The smooth black pull handles in this collection are made from malleable iron, treated with zinc phosphating process and then powder coated that has unique UV protection added to the coating process making these handles a great choice for external use.

Supplied in SINGLES complete with fixings.
