

## SOVEREIGN system - 12" handle

Beautifully designed and precision manufactured, this is a system of interchangeable handles, extensions, counterweights and collets.

With the majority of Robert Sorby's wood turning tools now available "unhandled" in versions compatible with the Sovereign handles the system offers unparalleled versatility and value.

Originally designed to address the demand for flexible handle lengths and provide alternative and practical tool storage options, the Sovereign has become a woodturning legend and industry benchmark.

Its softex nonslip grip provides excellent comfort and stability, while four easily interchangeable collets ensure the majority of Robert Sorby's vast turning tool range fit this agile system.

The newest of the Sovereign handles. At 12" this handle size delivers control at close range making it ideal for smaller projects. The Sovereign system from Robert Sorby.

As well as the handle only option, there is the SOV-12S which comes with two collets (SOV-C10 and SOV-C13).

## Price
