

Alukap-SS Low Profile Bar*

Alukap®-SS takes commercial and canopy glazing to a whole new level, manufactured with awesome spanning strength, and all powder coated aluminium profiles for maximum longevity. Any roof glazing structure gets the highest impact from the elements, so making sure that it is manufactured from the most robust materials and highest quality design is absolutely fundamental to providing a long-lasting solution. Alukap®- SS is manufactured entirely from powder-coated aluminium extrusions that withstand the toughest and most challenging of environments

Alukap®-SS is extruded to deliver a high structural spanning strength providing the ultimate glazing bar system for both commercial, residential and public building structures and canopies. Additionally, Alukap®-SS is designed to work well with Axiome® polycarbonate sheet, single glass glazing and double glazed units. All glazing options work perfectly with the Alukap®-SS wall plate and eaves beam structures too.

The Alukap®-SS Low Profile Bar typically spans up to 3m, and continues to be an incredibly popular option. For longer spans, refer to the Alukap®-SS High Span Bar.

Alukap®-SS White RAL 9010 and Brown RAL 8040 as standard, and any RAL colour can be manufactured to order, suiting any colour scheme required.
