

Axgard-MSR 3mm Mirror Flat CNC Edge Finish, Corner Holes & Radii

Shatter Proof Mirrors

Combining unbreakable polymer resilience with a specially formulated, tough, UV protected, scratch-resistant coating, Axgard®-MSR holds the key to success for many projects globally.

Very much at home in highly destructive and impact-prone environments, the core strength of Axgard®-MSR lies at the heart of it's success, and the added benefit of tough abrasion resistance and anti-graffiti properties makes it a favourite with specifiers and contractors alike.

Fixing is simple; Axgard®-MSR can be bonded to any flat substrate, or mechanically fixed. In demanding, high-security applications, a combination of both provides an extra safeguard.

Axgard®-MSR mirrors can be provided with pre-drilled holes and various options of anti-ligature edge finishing and radius corners.

Qualities

- Virtually unbreakable
- Excellent scratch resistance
- Anti-graffiti properties
- Excellent Class 1/0 fire rating
- Superior clarity
- UV resistant - suitable for internal and external use
- Reduced maintenance costs
- Anti-ligature options available
- Can be bonded for hidden fixing

Common uses

- Mental healthcare
- Hospitals and clinics
- Schools
- Prisons
- Public amenities
- Shop-fitting
- Dance halls
- Gyms and sports centres
- Swimming pools
- Food preparation
