

Polypropylene Hay Nets

Colourful Polypropylene Nets used to hang up hay. Comes in either small or large sizes.

Large sizes are manufactured with metal rings at the base and also around the top. This enables easy filling and securing. Mesh design allows easy feeding while reducing waste.

Small sizes are specifically designed to meet the horse's natural instinct to constantly consume small quantities of food. The smaller mesh increases the time a horse spends eating, aiding the horses digestion. These feed nets are both strong and rot-resistant.

Price

Large - Blue Hay Net (Product reference 7673-16728)	£4.24
