

Spindle roughing gouge 5/16" (8mm) 866 866H

A commonly used tool recommended for the initial turning of uneven or square spindle stock to round. The shape of the spindle roughing gouge enables the tool to cut safely with the wings (the tips of the side walls) well back from the work piece. This tool is commonly used for preparing pen blanks.

There are two versions available, one with a fitted handle and one without.

*** By purchasing this product, you are confirming that you are AGED 18 or over and that the person receiving the delivery is also over 18. Please note that we do occasionally ask for proof of age. ***
