

# Kirkpatrick 1204 Rim Lock Set

This Antique malleable iron rim lock set 1204 is ideal for doors and gates. This can be supplied as lock, latch and deadlock. It is supplied with 1550 knob, oval escutcheon and a Wilkes spindle. Please note that the deadlock option is not available in Cast Brass.

The rim lock design is a surface mounted box that contains a lock and latch. The lock and latch are fixed to the door, rather than being set into the edge of the door.
