

ERA Homeguard Alarm System

The ERA HomeGuard Pro is a fully integrated cloud based smart home alarm system that allows you to monitor multiple locations for example your home, your business and your garage from one account. You can choose who gets access to your home with timed or anytime access and revoke when needed. You have peace of mind through the personalised alert log showing who accessed the property with timings, for example, 'Lucy has disarmed the alarm'.

If the alarm is activated your network is alerted quickly with simultaneous alerts to as many people as you choose and phonecall alerts via GSM. You can also expand the kit at any time with additional accessories to include multiple PIR sensors, IP Camera's, water and vibration detectors. Plus as the system is cloud based, you can access the alarm hub from anywhere, anytime with your App controlled via a Smartphone. With Lithium backup battery you can also be sure that even if there is a power outage the property is still protected.

The ERA Homeguard Pro is also compatible with the LightWave range of lighting, heating and power solutions for the perfect smart home experience.
